Aide pour générer vos diagrammes de classes

Visual Paradigm

Visual Paradigm

Il est aussi possible de générer des diagrammes de classes avec IntelliJ avec la version disponible sur le site du DIM (la version ultimate). Ce n'est pas mon cas alors je ne peux pas vous faire des captures d'écran

2 IntelliJ IDEA 14+

• Show diagram popup

Right click on a type/class/package > Diagrams > Show Diagram Popup...

or Ctrl + Alt + U

• Show diagram (opens a new tab)

Right click on a type/class/package > Diagrams > Show Diagram...

By default, you see only the classes/interfaces names. If you want to see more details, go to **File > Settings... > Tools > Diagrams** and check what you want (E.g.: Fields, Methods, etc.)

P.S.: You need IntelliJ IDEA Ultimate, because this feature is not supported in Community Edition. If you go to File > Settings... > Plugins, you can see that there is not UML Support plugin in Community Edition.
